ESPEE'S Oil BURNERS.

RENO (Nev.) Jan. 25.—[Exclusive Dispatch.] After nearly two years of patient trial and endless experiment, the Southern Pacific Company has abandoned the attempt to install oil-burning engines on its road between Rocklin and Ogden. In all, twelve were being used over the road. The order has just been issued that the engines are to be transferred to the level divisions throughout California.

The new oil burners were of the very latest type, and were used at first on the fast trains of the company. No trouble was experienced in producing fire with the oil, but it was found that the heat produced was not as great as with cost.

about \$100,000,000. Now Adam was born about 6000 years ago and if he had lived until the present day, put-ting aside \$10 each day of his life, he would not be at this time as wealthy as Mr. Vanderbilt at the time of his

death.

"There should be no limit to what a man makes, provided he makes every cent of it, but such an amount as I have just mentioned could not be got together by labor, either manual or mental; some of it has been taken from common stock.

"Taxation should be levied on possession, for it costs the government more to protect wealth than poverfy. The man who has to depend on his muscle has a poor chance in the world. Brain development is the road to success, and effective industrial education will abolish class distinction."

RECORD OIL WELL.

ing Steadily Six Thousand Barrels a Day.

(By DIRECT WIRE TO THE TIMES.)

NEW YORK, Jan. 25.—[Exclusive Dispatch.] The Sun's Orange (Tex.) special says that the record oil well of the American continent is the No. 1 of Bass & Benckenstein of Jenningsfield, in Southwestern Louisiana. It came in September 8, 1994, and up to December 31 had produced 1,280,000 barrels a day. It started as a 16.000-barrel "gusher" and is still doing steadily 6000 barrels a day.

Another well in the same field, which promises to surpass this record is Wilkins No. 2. It began gushing November 21, 1994, and had yielded at the close of the year 512,000 barrels. It is still giving up 12,000 barrels a day.

SEVERS WINDPIPE, GETS WELL CHICAGO, Jan. 25.—The remarkable recovery of Mrs. John Lelendecker, who, after severing her windpipe, over a month ago, is now almost completely restored to health, is causing astonishment not only among her friends, but among medical men. A peculiarity of the case is the apparent removal of the disease which had inspired, the woman to take her own life. For many months Mrs. Lelendecker had been ill with chronic stomach thouble. Seeing no prospect of relief and crazed with pain, she secured a knife and

IGNORANCE COST LIVES. BOARD OF HEALTH REPORT. (BY THE ASSOCIATED PRESS-A.M.)

SACRAMENTO, Jan. 25.—The report of the State Board of Health for the month of December, issued today, among other things, says:

"The general health conditions of the State are not all that could be wished nor what they might easily be made. Epidemics and infectious diseases have been quite prevalent and have taken many lives that could have been saved had the people understood the danger and the authorities been equal to the occasion.

"Diphtheria, for example, is given credit for killing six. As a matter of fact, many more have died in the outlying districts, which never report, and which are, owing to poorty-organized or no health department, not properly quarantined.

"Typhold has decreased materially."

or no health department, not properly quarantined.
"Typhoid has decreased materially since last month, but pneumonia has increased almost 199 per cent. Although the death rate from this disease is no more than in other Decembers, its large increase in certain localities shows the contagiousness of the disease and the necessity of reporting all cases and their isolation i ing insisted upon.
"Of the 1361 reported deaths in December, one-fourth were sacrificed to want of proper information among the people and proper sanitary laws and organization."

from long exposure to the chilling
blasts, and dive of them were more or
less seriously hurt by being caught
beneath a falling wall. The firemen
worked under most discouraging and
trying conditions. Flying spray froze
the moment it touched their garments,
and long before the fire was controlled
many of them resembled huge cicles.
Chief Croker was obliged to discard

SENATE COMMITTEE'S IDEAS. WASHINGTON, Jan. 25.—[Exclusive Dispatch.] Californis, within recent years, has had more squabbles over lieu lands than any other State, and therefore the bill reported favorably today, from the Senate Committee on Public Lands on the question applies with probably more force to California than any other State. The bill is as follows:

ment from the date of the order or proclamation releasing or excluding them, but shall not become subject to entry, filing or selection under any law to construction or selection under any law providing for the disposal of non-mineral public lands until after ninety days notice by such publication as the Secretary of the Interior may prescribe. The Secretary having supervision of the forest reserves may, upon application or otherwise, ascertain, list and describe, by metes and bounds, or otherwise, lands within the reserves which are chiefly valuable for agriculture, and the lands so listed may at the expiration of ninety days from filing the list in the land office of the land district in which they are situated, be apassed.

# ONTARIO ELECTIONS

O TTAWA (Ont.) Jan. 25.—[Exclusive Dispatch.] The Ontario elections, held today, proved a great surprise as they resulted in the defeat of the Liberal government, which has been in power for the last thirty-two years. James Pliney Whitney, who waged such a strenuous campaign against the present Premier, Hon. George W. Ross, and brought the majority down to three, will be at the helm of the new administration. The complete returns for the ninety-eight seats are: Conadministration. The complete returns for the ninety-eight seats are: Conservatives, 70% Liberals, 28. Ross himself barely escaped, being elected in West Middlesex by only fifty majority. Hon. F. Latchford and Hon. John Dryden, two of the Ross cabinet ministers, were snowed under.

Toronto, Hamilton and nearly all of the cities went strongly Conservative. Ottawa created the surprise of the campaign by electing two Liberals in place of the previous two conservatives. There was the wildest enthusiasm over the victory after thirty years fight. Particularly in "Tory" Toronto was there jubiliation. To the charges of corruption against the Ross government is attributed the sweeping change.

TORONTO, Jan. 25.—The Liberal government of G. W. Ross was overwhelmingly defeated at the polls today, the votes standing: Conservatives, 69; Liberals, 29; a majority of 40 seats.

Premier Ross retained his seat by only 30 votes, while five of his ministers, G. M. Gibson, Attorney-General; J. Katchford, Secretary of State; Mr. Evanturel, minister without portfolio; John Dryden, Minister of Agriculture; and W. H. Charlton, Minister of Crown Lands, were defeated.

All of the cities except Ottawa went Conservative, the plurality reaching 1000 in Toronto. J. P. Whitney, the new Premier, had nearly 1000 majority. The issue in the campaign was the charg's of ballot-box stuffing, bribery, etc., made against them.

During the night hundreds of arrests were made.

The only decision of the government thus far is to preserve order at all cost. "The government is living over a volcane and can do nothing else," said a high official this morning. "Every other consideration must give way to the question of public order."

The night was quiet, although a tew shots were heard in the Vassiliostroff quarter. Patrols paraded the streets all night long, stopping and interregating people. Bodies of workmen continued to march through the principal thoroughfare until midnight. The shops are still closed today. Bodies of troops remain in several streets, though on the whole the city has a quieter aspect.

With the exception of the Official Messenger and the Russky Invalid, no newspapers have appeared.

The workmen at the Nevsky yards presented themselves there today in order to receive the balance of their wages, but the demeanor of the strikers was quiet.

Burke of Alameda handed in a bill this morning raising the saisaries of the ludges of the Superior courts of San Francisco, Alameda and Los Angeles counties from \$4000 to \$5000 per annum. This measure is a compromise bill offered as the substitute for the bill introduced by the San Francisco delegation previding for a raise of the San Francisco judges salaries of 2000.

The San Francisco contingency redused to let the representatives of Alameda and Los Angeles counties in on the deal and the members from those counties, got in and defeated the measure. The new bill introduced by Burke bids fair to have clear salling. This bill was also introduced in the Senate by Leavitt.

Wickersham of San Pedro introduced a bill in the Assembly this morning which makes some radical changes in methods of procedure in altering city bouncaries. The proposed law provides that the legislative body of any city, upon receiving a petition signed by a majority of the qualified electors, may submit the question to vote.

PRISON REFORM MEASURE.

McKemer, chairman of the Assembly committee on State prisons and reformatory institutions, handed in the first of a series of bills which have been largely framed by the hold-over committee of last session, by which the State prisons and reform schools are to be converted into a graduated system of real reform, beginning with the Preston school for truant juveniles and ending with Folsom for the morally abandoned and hardened criminals. The bills are designed to meet the needs siready set forth in the report of the hold-over committee, of which Speaker Prescott was the chairman.

The proposed object of these experiments are to discover some form of virus with which these small animal
peats may be inoculated and stamped
out by disease.

A proposition to reapportion the
school fund brought a large delegation
of San Francisco education before the
Senate committee on education today. A new apportionment would reduce Los Angeles's share of the school
fund \$28,000: Oakland, \$42,000; and San
Francisco \$215,000. Gov. Pardee inscired the bill, which was drawn up
by State Superintendent of Instruction
Kirk.

Kirk.

It is proposed to have the apportionment of school funds on the basis of teachers and schoolrooms used in a county, not on the census of children, as at present.

The Senate Judiciary Committee recommended the passage of Senator Fendleton's bill providing for city treasurer's depositing the city's fund in banks. A constitutional amendment will be necessary to make the measure a law.

CROUCH BROS., THE LONE

Problem of Economization, Some Practical Points Bearing Jpon the Question—The Ever-present Evil of Waste.

BY DR. J. P. WIDNEY, 150 West Adams Street.

The Old Reliable

ABSOLUTELY PURE

There is no substitute

of the cañons.

Every gailon stored at the sources of the streams has a double mission before it—to develop water power for electric plants—then to go on to? Its work in suppiying the needs of the cities and fields below. A careful survey of this whole mountain regionshould be made without delay to show the possibilities and the cost of storage in the upland mountain valleys about the headwaters of the streams. This upland storage would also help to diminish the damage from winter floods in the valleys below. In fact, the time should come when through mountain and foothill storage there would be no winter floods in the valleys. A way should be made for secondary storage reservoirs of still greater capacity in the foothills at the base of the mountains, and in the second range which lies east of the city at the foot of the San Gabriel plain. Without interfering with the irrigation rights of the farm lands of the lower San Gabriel, this waste water could be stored and utilized for the city's needs. Before talking of water at enormous cost from the high Sierra, we should utilize the waters going to waste at our very doors; and the time to secure and digest this information, and to devise plans, is now and not when the pressing need is upon us.

It is safe to say that a proper development of the water resources of our own river, the Los Angeles, and its valley, even under the present wateful system of consumption, would suffice for the supply of a city much larger than the present. While we are thus developing the simpler plan, however, we should take advantage of the respite to carefully devise and secure the necessary information for the broader plans for the future.

But there is another subject of scarcely less vital importance still to be considered.—[Second—installment tomorrow—Ed.

TIN CUP GROUP STRIKE.

ording to Word from Goldfield Rich Ore Has Been Found in Two

Word has been received from Gold-field of an excellent strike recently made on the Black Butte and Quartz-site properties, in which a number of Los Angeles people are interested through their holdings in the Goldfield Mining, Brokerage and Investment Company of this city, which owns the Tin Cup group of claims extending along the entire southern line of the Black Butte and Quartzsite. In the Black Butte a strike has just

Goldfield-Herald Mining Stock Advances in Price

If you failed to get in at 1 1-2 cents don't neglect to take advantage of a limited number of these shares now on sale at 2 1-2 cents. This offer will not last long. Avail yourself of the opportunity to invest in this stock before another increase in price.

Ore Assaying \$200,000 Shown On Street

There was shown on the streets Tuesday evening a piece of ore from the great Sandstorm strike, having an assay value of \$200,000. The piece was two inches long, a half-inch wide and faced with a quarter of an inch of solid gold. This was picked up in the brush after firing the first shot in the rich lower ledge An ettemnt was made to keep the ore from flying by overlaying the vein with a mattress. This was a failure and two powder boxes of rich stuff was picked up in the brush. It is believed that over \$300 was lost in this way in the first shot.

The third shot made the following day was fired under a thick cover of hides weighted down with rock. This was a success. After this firing five sacks were filled with stuff so rich that it is almost useless to make an estimate. One piece went into the sacks the size of a man's fist that had in it at least \$150 worth of gold. Some who saw it put it higher. If one should place the value of these five sacks at \$2500 he likely would not overstate the actual returns in gold from this third shot. The \$10,000.

The foregoing is taken from the Goldfield News, a daily publication, which uses as a motto, "All that's true of the greatest gold camp ever known." The Sandstorm claim is located within a short distance of the claims controlled by the Goldfield-Herald Co. Stock for sale by the Southwestern Securities Company, Los Angeles, Cal.

Information Concerning Adjoining Claims

Now is the time to take advan-tage of an opportunity that will without doubt lead on to fortune. without doubt lead on to fortune. But it means a prompt acceptance of a waiting proposition. In the search for gold the man with a small sum stands as great a chance as the capitalist in acquiring an independence. We know that our property, surrounded as it is with paying mines that are shipping ore running almost a thousand dollars to the ton, that we will have a paying property. At least our offer is worthy of serious investigation—a matter that will cost you but a stamp and a moment of time. Surely this is something you can afford and when our literature reaches you you can have then time to most and when our interature reaches you you can have then time to most thoroughly investigate our offer. If, after the close study which you give the matter and you find it does not appeal to you, you have lost little. If we convince you that it is a worthy investment and you long us in the formation of the join us in the formation of the company and our stock goes on moving upward in price as Mount Whitney has done, you have soon doubled and multiplied your original sum. The present price of 2½ cents a share will surely not last long; but it will give you plenty of time to get in at this figure if you

We ask you conservatively, can you find a proposition on the market today that promises better returns than that of mining? And if it be mining, can you find a field that shows gold in greater magnitude than GOLDFIELD?

GUNS AGAINST WAITERS.

Suddenly the door was thrown violently open and two men ran in. 'heir faces were covered with bandana hand-kerchlefs, and their slouch hats were pulled far down. They carried revolvers of large caliber. Jabbing their weapons against the sides of the waiters, who were near the door, they commanded ail those in the room to throw up their hands. The commands were accompanied by the vilest of language. They kept flourishing their weapons and threatening to shoot.

Driving their victims behind the bar they compelled them to stand it line. Thin they ordered one of them to pen the cash register and empty it upon the bar. This command, was obe ed, and more than \$200 was laid in a pile. Keeping the men well covered, the robbers began scooping up the coin and thrusting it into their side coat pockets. Two masked men heavily armed, and Main streets, at 12:30 o'clock th. morning, and at the points of their revolvers robbed the proprietor and four of his waiters, securing more than \$20.4 the exact amount not being known.

The daring robbery was committed in a room adjoining the large dining hall, and also adjoining several private dining-rooms in which were more than fifty persons, members of aftertheater parties who had gone to the cafe for a late dinner.

Not until the desperate criminals.

Bers gave one, Gus Kerner, a chance the had been looking for. Thinking the had been looking for. Thinking the robber was not covering him, Kerner sprang into the kitchen and to-ward the down.

One of the robbers commanded him to follow Kerner, for that would leave his pal with five men on his hands. Kerner succeeded in Jodging under a cellar door and around a corner before the robber could shoot. Kerner duckly made his way to the street and began calling for help. His cries attracted Patroliman Riley within a minute.

PANIC AND CROWD.

Meantime there had been a panic in the care. Guests had seen the masked men marching the watters upstairs and

men marching the waiters upstairs and there was a rush for the doors. Unminiful of this the robbers took their victims into an upstairs room and lined them up against the wail with their hands upraised. Then they began searching them.

They first searched Vielle, one of the robbers taking his watch, but overlooking a pocketful of coin in his hip pocket. The other robber gruffly told his companion to "take no watches, but look for the coin," but at first the watch was not returned. Vielle asked that it be given him, and the robber threw it upon a table.

The sounds from the outside indicated that the alarm had attracted a crowd on the street, and the hold-ups desisted from their work without trying to search the pockets of any of the others. Backing out of the room they ran downstairs, and one of them went out through the Main-street entrance, the other going through the Flithstreet entrance. CHASE DRAWS FIRE.

At that moment Kerner saw Patrol-man Riley, told him what had hapman Riley, told him what had happened, and started toward the front entrance, the officer taking the other entrance. Kerner almost ran into one of the robbers, who came out the front way, and immediately pursued him. The chase was taken up by others.

While he was crossing the street the robber turned and fired a shot at Kerner, but did not hit. He then continued to run, but as Kerner continued after him the robber turned and shot again. Then Kerner gave up the chase.

weapons and threatening to shoot.

Driving their victims behind the bart they compelled them to stand in line.

Then they ordered one of them to pen the cash register and empty it upon the bar. This command was obe ed, and more than \$200 was laid in a pile.

Keeping the men well covered, the robers began scooping up the coin and thrusting it into their side coat pockets. This completed, they started to search the pockets of a waiter, but one of the robbers told the other to stop.

KERNER BREAKS AWAY.

The tailer of the two robbers ordered the waiters to get in line in the aisle in front of the bar, and then commanded them to martin upstairs. To reach the stairway it was necessary to the party to go through a hall in full view of the half-hundred guests, who smill that moment had known nothing of what was happening so near them.

nished room.

Last evening Miss Florence had a caller in the person of Edward Eaton, also a roomer in the house, whose "profession" is washing dishes in a chophouse. Early in life he had taken a postgraduate course in the great American game of draw poker, and what he does not know about that science has not been demonstrated. He is an expert, for he proved it.

Whether it was the hostess or the guest who suggested it does not appear, but Miss Florence said she had always wanted to learn the game; was sure she could play it; could play euchre or hearts to perfection. Yes, Edward would teach her to play; they started the first lesson forthwith.

As a pupil Miss Florence was not apt, or perhaps it was Eaton's skill, but whatever it may have been, Eaton soon won \$11 of face powder money and then reinembered that he had an engagement. She protested, but he insisted and departed.

Then Miss Florence remembered she had heard of such things as card sharks, bunco steerers, marked cards and phony decks, and the more she thought about it the more she was convenced she had been victimized. Her next step was to call a detective. She told him her story, and he found Eaton and compelled him to return that \$11. He declared he had intended to return that \$11. He declared he had intended to return tithis morning, but just as the officer was leaving, Eaton murmured regretatily:

### MOST GIGANTIC OF WORLD'S 'SCOPES.

Finishing Touches on Wondrous Astronomical Station. Topping Mount Wilson Like Fabled Dragon. Ready for Business in Few Days.

THE newest astronomical observatory in the world is just approaching completion on Mount Wilson.

It is not only the newest but it will be the most complete in some of its features, the most perfect in some of its rechanical appliances, and the most bigantic in some of its proportions on the globe.

The oldest observatory was established on the wall of Peking in the thirteenth century, being founded by that bold conqueror, Kubiai Khan, in the war 1279. The oldest in Europe was founded by King Frederick II of Denmark where the famous astronomer Tycho Brahe, friend of Kepler. carried out his celebrated observations in the sixteenth century. The oldest

public observatary established in America was founded by the doquent lecturer, A. M. Mitchell, in Cincinnati, in 1844. His thirteen-inch objective was then the best in the world. All of these observatories were conducted under the auspices of the old astronors which dealt with distances, magnitudes and motions only. nitudes and motions only.

About the middle of the nineteenth century the new astronomy came into vogue. It inquires into the nature and constitution of the heavenly bodies, the eigenents of which they are composed.

constitution of the heavenly bodies, the eigenents of which they are composed, their temperature, and the history of their origin, formation and development and even endeavors to forecast their future. The old astronomy required only optical instruments with which to presecute its investigations. The new astronomy employs the varicus agencies of spectroscopy, photography, electricity, chemistry, etc., in conducting its researches into the realms of the infinite.

LIKE A DRAGON.

When the New Zealand archaeologist of 28th climbs the topographical eminetice now known as Mount Wilson, he will have ample food for speculation. He will see prone along the mountain top, wriggling its way through a triangle of golden oaks, manzanita and chapparal, the semblance of some fierce dragon of prehistoric times, with talsed head projecting towards San Gabriel Valley, as if in quest of a morsel iarge enough to meet the demands of its 226 feet of centipedal length.

This enormous dragon, in the year 1806, will represent the ruins which time could not devastate of the great Snow horizontal telescope structure now approaching completion on the summit of idount Wilson, and which will be ready for practical work February 10.

New Zea and scientist, for he will wonder if the world has been swung Just
that much from its former axis since
these piers were erected.

The fact is that the alignments were
made to suit the topography of the
mountain top, precise orientation being
immaterial for the special work for
which the structure is designed. In
truth the Snow telescope will be a series of novel mechanical and opti-al
devices, strateged on a succession of
granite protestals, and housed in an
iron framework supporting a shingled iron framework supporting a shingled roof and canvas sides, the entire structure being 220 feet in length. MIRRORS ON MIRRORS.

On the massive pler at the southern end will be placed the coelastadt, consisting of two plane mirrors, one fixed and the other having a rotary motion, the combination enabling the observer to reflect the rays of the sun from any position in the sky to either of two concave mirrors, one having a sixty-foot focal distance, which will produce a seven-inch image, and the other having a 145-foot focal distance which will produce a 16-inch image of the sun. having a 145-foot focal distance which will produce a 16-inch image of the sun. These mirrors. each twenty-four inches in diameter, are available for either solar or stellar spectroscopy. For the latter purpose they will be conducted into the "constant temperature" room, a triangular apartment with triple walls which preserves an unvarying temperature. Adjoining the constant temperature room the two

interior lighting for the present—the latter need being supplied by electric currents sent up from below a little later.

Near the machine shop is the building which houses the splendid Bruce photographic telescope, specially designed for the Yerkes observatory under the supervision of Prof. E. E. Barnard of world-wide fame. He was busy when seen directing operations of carpenters and other workmen and states that everything will be ready for practical work within a week. But Barnard, who arrived a few days ago, bringing the precious lenses of his triple telescope as personal luggage, is not on Mount Wilson for the first time. Precisely twelve years ago, under date of Lick Observatory, January 31, 1893, he wrote as follows to the writer of this article:

"I feel confident that some day a great observatory will be built on one of the peaks of Southern California, most probably in the Sierra Madre Mountains. From what I have seen in a personal visit, I think Mount Wilson is an extremely favorable site. The great thing in astronomical observations is steadiness of the atmosphere.

From what I have heard of the Harvard College party in a year's occupation of Mount Wilson, I should say the mountain is perfectly satisfactory in that respect."

Prof. Barnard has the choice of accempanying the solar eclipse expedition to Spain in August of this year or coming to Mount Wilson in charge of the Bruce telescope, and he had no hesitation in making his choice. His work during the coming season will consist largely in photographing those lich portions of the Milky Way extending from the Zenith to a zone 9 deg, farther south than he could reach from the Yerkes Observatory.

This great eye will peer into the depths of space far beyond the limits of any other telescope ever constructed, and by portraying the delicate details of nebulous objects hitherto seen only as filmy c. Suds or feathery wisps, will reveal secrets of world formation never before rendered visible, and perhaps never even suspected.

A wonderful trip is that which takes one from the orange groves of the foothills up through the wild fastnesses of the deep and precipitous mountain gorges to the summits of Wilson's Peak, more than a mile above sea level. A narrow shelf along the face of frowning cliffs, forming cascades singing down the bouldered cafons, dark recesses lined with feathery ferns, glant plines springing out of the rock crevices, an ever-widening landscape of foothill, valley, city-dotted plain, and a blue fringe of old ocean—these are the surprises and fascinations which greet the toiling traveler as he climbs toward the goal for which he sets out. And it is here amid groves of yellow and sugar pine, Douglas spruce, golden oak, buckthorn and manzanita, in this normally calm and cloudless atmosphere is below the observer, above the fogs and dust-laden air of the atmosphere is below the observer, above the fogs and dust-laden air of the atmosphere is below the observer, above the fogs and dust-laden air of the tamosphere is below the observer, above the fogs and dust-laden air of the tamosphere is below the observer, above the fogs and dust-laden air of the atmosphere is below the observer, above the fogs and dust-laden air of the tamosphere is below the observer, above the fogs and dust-laden air of the tamosphere is below the observer, above the fogs and dust-laden air of the tamosphere is below the observer, above the fogs and dust-laden air of the tamosphere is below the observer, above the fogs and dust-laden air of the tamosphere is below the observer, above the fogs and dust-laden air of the tamosphere is below the observer of the transpo

WHERE MONEY COMES FROM. WHERE MONEY COMES FROM.
The funds which enable Dr. Hale to
construct and equip the group of astronomical buildings on Mt. Wilson-come
from various sources, the principal one
being the Carnegie Institution of Washington. Just what proportion of the
funds will come from other coöperating
institutions and private individuals has
not yet been determined. It is whisnered however, that the wealthy father pered, however, that the wealthy father of Director Hale is one of the large

Alpine heights.

The snow yesterday stood on the San Antonio range to a general level about 2500 feet below the summit of Old Baldy, and formed a charming background to numberless views where great tree trunks or the gnarled branches of old pines framed the foreground, and the thick follage of evergreen oaks lent brightness and variety to the picture.

Numerous Poker Joints are Closed by Police.

Young Nobs of West Adams Street Gathered in.

Stiff Faro and Roulette on the Adobe Road.

Unaccompanied by spectacular raids or the hauling of scores of prisoners to the City Jail, two policemen in plain clothes have within the past two weeks closed no less than sixteen poker games which were in nightly operation in various parts of the city. They say their work has only begun. They add that the crusade which they have been making on the poker joints has caused the bigger gamblers who had intended to open a faro and roulette joint in a downtown business block to catch the race business, to abandon that plan and instead, open a big gambling joint just outside the city. If that be true it is for the Sherig or some of the numerous constables to head them off.

Heretofore the police have found it

to head them off.

Heretofore the police have found it almost impossible to secure convictions after poker raids and a few weeks ago Chief Hammel adopted another, plan. He detailed Patroimen Walker and Zeigler for the work and instructs them to devote their whole time to the closing of the games which were known to be running. The plan adopted by the officers was to keep after the gamblers without giving known to be running. The plan adopted by the officers was to keep after the gamblers without giving them any rest. The games in the various downtown joints were visited and the officers were admitted, but then they found only innocent card games in operation. They knew that they had stopped poker playing for a moment at least and they proceeded to take the names of the players. Then they warned the managers that their places would be raided if they continued in business.

No reputable business man wants to be caught in a raid upon a poker game and after a few warning visits had been paid to the joints by the officers, the patrons, not professional gamblers, kept out. Business fell off until only the gamblers were left to play against each other and with no "suckers" to "bleed" there was no profit in the games. It was too much like cutting each other's throats and one by one the games were closed.

This was not the case with raference to all the joints and some of them are still open, but the police are cantinuing their work and where three weeks ago there were many games, now there are but few and no patron can tell at what moment the police will raid them. A close watch is kept upon the places still open and frequent visits are made, the result being that few persons of the class who fear arrest and exposure are patronising the joints.

and chips. The party was taken to the Police Station, but as the officers knew they had not sufficient evidence to convict; owing to the prominence of some of the families involved, the players, all of them young men, were not booked and their names were not made public. They were warned against repetition of their infraction of the law and permitted to depart. The big gambiers of the city have opened a joint on the Adobe read near the Pasadena short line, at which there is said to be some heavy playing. A bookmaker is reported to have dropped \$2300 at one sitting at fare a few nights ago. The place is only a short distance from the city limits, but the police have no jurisdiction. Cappers for this place are stationed at the Sixth street station of the Pacific Electric Railway to show prospective victims where they can "buck the tiger" to the limit of their pile. The cappers are said to be paid a certain sum per capita for the persons they steer against the games which include everything from craps to fare and free booze and lunch.

A special meeting of the Council will be held today for the purpose of falifying this agreement and awarding a second contract for supplying sewer brick.

Under the terms of the agreement the city releases the Independent company from its bond of \$40,000 for fulliment of contract, and agrees to pretect the company's property from lamage from the sewer. City Attorney Mathews, who effected the final methement, said last night that the agreement with the Independent company is highly favorable to the city. The brickmakers finding that are quantil was determined to have brick seconding to specifications, yielded every point in contention. The terms of settlement are identical with those proposed by the last Council.

It now appears that the real delay in the construction of the big dich to the ocean has been occasioned, not so much by the failure of the Independent company to supply brick as by the clust in the company's inglewood ands.

TROUBLE OVER RACING DATES. SITUATION IN NEW YORK.

BIT DIRECT WIRE TO THE TIMES!

NEW YORK, Jan. 25.—[Exclusive Dispatch.] Several prominent turfmen who gathered at the Broadway Hotel today discussed at length the story that will not down, that there is trouble of most serious nature among the stewards of the Jockey Club, caused by the proposed allotment of racing dates. While it is known that the applications for licenses and dates filed by the Empire City track and Morris Park have caused much deliberation and some difference of opinion, it is asserted that at least one proprietor of a race track has positively refused to accept earlier dates than usual, in order to accommodate Belmont Park.

Some persons inclined to look at the situation from the dark side say that the present friction may develop into an open rupture, in which event racing will not have any too much strength at Albany.

Public Picks Win Easily at

Ascot Park.

Descuento Takes His Sixth Straight Race.

Big Crowd Sees Good Sport on Fast Track.

Five favorites that won and the other winner dividing the betting price with the second horse, was what the bookmakers had handed them resterday at Ascot, and as a consequence every man with a store in the ring

was badly stung all day.

From the Stubenbord entry in the first race to Montana Peeress in the last, it was one long procession of well-played favorites racing past the finish line, and every time a bookmaker looked out as the ponies dashed past the stand he wished that he couldn't see straight. After this business had gone on for six races the storekeepers were very thankful when the last race was over.

The usual large crowd filled the grand stand and betting ring, and the spectators saw fine racing, for the track was fast and as far as one could judge the best horses won in each race. It seems that the judges have been giving the jockeys some stiff tectures, and these remarks have shown 'their effect in the riding this week which has been good in almost every race. The bitter experience of the boys suspended for funny rides has shown the others that it is not worth while to fool with the men who call the winners.

DESCUENTO'S SIXTH WIN.

DESCUENTO'S SIXTH WIN. The card was a very fair one, but there was no race of estartling nature except the third, which was won by Descuento. This was remarkable for the fact that with the race conceded by every one to Descuento, the bookakers went right along and laid 4 5 against his chances, and later 7 As a matter of fact this hors should have been about 1 to 20. The others might just as well have been scratched out and kept in the barn as to come out and try to beat Des-

as to come out and kept in the barn as to come out and try to beat Descuento.

This good one has started six times during the meeting and won every race. On his first out, December 18, he closed in the betting at 20 to 1, and won in a driving finish from Facilico, who actually tried to beat Descuento. Since then his price has been going down until it touched the low-water mark of 1 to 4 when he was in against Tramotor and two others on January 12. He has enever been extended since he commenced to race here. On January 2 he had Bologna, Capitanaso, Blue Coat, Tramotor, Raiph Reese and White Stone in a race, and to his surprise Bologna shot out in the lead and tried to run away with the race. Bologna led him two lengths at the first post, and as soon as Descuento observed this he let out a few kinks, which he soon put into the Bologna and led this good one three lengths at the last turn and beat him easily by two lengths.

Testerday after the start of the third race the cry went up from the ring that Descuento was running away with his jockey, but this was a mistake, for he was just having a little fun with the horses behind him. He was an easy first all the way, and one with the horses behind him. He was an easy first all the way, and on with the horses behind him. He was an easy first all the way, and on with the horses behind him. He was an easy first all the way, and on the stretch run. The others were simply not in it as far as being first was concerned.

ENTRIES CLOSE NEXT WEEK.

Horsemen who are now here that desire to make entries for the races this summer at the St. Louis Fair grounds track, Delmar, Kinlock or Little Rock can do so in the secretary's office in the paddock, or with J. P. Martin at the track. Entries for all of these tracks close February 1 for the stake events. Kinlock will race from April 15 to May 19; Delmar from May 20 to June 2 and September 4 to October 31; Little Rock from March 20 to March 25, and St. Louis from June 3 to September 2, all inclusive.

The best stakes of course are offered by the St. Louis track, which, beginning June 2, will have fifteen stakes ranging in value from \$1500 to \$7500 added money, the latter being the Derby. At such a meeting there will insturally be good overnight events and rich handicaps during each week.

The principal stakes at Kinlock are the Inaugural at one mile with \$1500 added at nine-sixteenths; the Lucas selling stakes with \$1000 added at six furlongs, and the Mound City Derby with \$2000 added at a mile and an an eighth. These will be run every Saturday for five weeks, beginning April 18.

The short Arkansas meeting has the Capital Hotel stakes at one mile with \$1500 added, and the Anheuser-Busch stakes at one mile with \$500 added.

last night with a flattering entry of equine performers.

The 2.30 trotters will open the afternoon. The 2.20 pacers, free for all pacers, 2.25 trotters, free for all trotters, 2.25 pacers and 2.30 pacers will follow in order, heats being sandwiched as usual. The Canfield novelty three minute "race" will close the programme. Twenty are to start in this event, three teams being entered. Boaz Duncan will pilot Jessie D. and Ketchum; Dr. W. A. Connolly will shake the ribbons over Palo Verde and Lady, and T. M. Clark is to do the honors behind Mozon and George. Each team will draw two in the wagon to equalize the odds.

Dr. M. L. Moore wifi preside in the judges stand, his associates being Willard Stimson and J. A. Fairchild. Bob Smith, Lee Mabury and "Dick" Bundrem will do the clocking and Pop Bruner will pound the starters' bell.

Quite a notable display of new talent will be seen, both of W. A. Clark's speedy color bearers being sure starters barring the misfortunes of "racing luck" in the interim. Dr. Dodge's four-year-old colt Lohengrin is looked upon favorably by the veterans who have timed him in early-morning workouts, and all told, the races look much opener than usual.

In the 2.20 pace, Virginia, Daniel J. Casey, Glen, Athaio and a new one of C. A. Canfield's, will line up. The Clark entry looks a bit fast for the rest on paper, but the race will only be settled when it is driven off.

Gladys M. Big Dan, Willie Jib, and Lohengrin, a goodly quartet of yonng-sters, will debate for the 2.25 pacers' cup. The Dodge favorite looks to have a good chance of earning his spurs carly.

Rita H. and Briney K. are to start in the free for all trot; further comment is unnecessary to close followers of the game who know there will be a horse race whenever this pair come together.

The 2.20 trotters will be Chino, Albuquerque, George, Glennita and Red Ray.

I One of those rare events in the history of the United States—the impeachment of a Federal judge—is once more about to be witnessed before the bar of the national Senate.

That the government does not inderestimate the seriousness of the
situation has been made evident in
several ways. One of these was the
appointment of Gen. Trepoff, former
Chief of Police of Moscow, to the position of Governor-General of St.
Petersburg. The importance of this
action is better appreciated when it
is understood that the office was created for the present emergency, and
that Gen. Trepoff is vested with supreme power over both the military
and the civil authorities. As Chief
of Police of Moscow, he held the revointionists in check with an iron
haid, and he enjoys the confidence
of the Cuar to an extent not exceeded,
perhaps, by any of the latter's imme-

Another fact which indicates how seriously the situation is regarded by the government is the placing of a rush order with a German firm for a large number of machine guns. No unorganized mob can cope with trained soldiers armed with these terrible engines of destruction, with which the Bussian army is already liberally equipped.

The fact that numerous prominent persons known to be in sympathy with the revolutionists have already

persons known to be in sympathy with the revolutionists have already been arrested, shows that the government does not propose to deal exclusively with the rioters, but that it will pursue the propagandists to the last extremity. No quarter will be given nor expected, with Trepoff in aupreme command at St. Petersburg, and if is probable that the exiles in theria will soon receive many and totable additions to their number.

ON BACHELORS AND BENEDICTS.

A curmudgeon in New York has publicly declared that marriage means unhappiness, and that there is no married man in the country, if his heart of hearts were searched, but would be willing to exchange places with any bachelor. The propounder of this libel on matrimony is described as "a millionaire bachelor," philanthropist, and student of social and charitable problems." But unhesitatingly we write him down curmudgeon as well—a selfish, surly fellow. W. A. Woodbury is his name, and he is prepared to wager \$1000 that no one can prove to his entire satisfaction, and to the satisfaction of a committee that may be selected, that he is absolutely happy in the marital state, and would not, if he could, resume the freedom of a bachelor.

are prepared to supply both the com-mittee and the claimant. The latter, be it understood, will equitably share the spoil with those who make the award, for every member of the fary will be a married man, and not one would swap places with any bachelor in the land—not even with this million-aire of New York who drew the check, but has failed to draw life's greatest

prize, the love of wife and little chil-dren. Home!—It is the dearest and most sacred word in the English language. And there can be no home worthy of the name without the sweet presence of a wife, or the clinging fragrance of her memory if perchance she has preceded her loving ones across the Great Divide. And what millionaire bachelor's dwelling place, be it ever so fuxurious across the memory in the control of the contro rious, ever so immaculate, can com-pare with the home where children's caps are in evidence on the hall hat rack, and the sounds of their happy voices come echoing along the corri-dor? The paint may be a bit scratched,

beautiful, for beauty is of the heart, not of the eye, O bachelor friend.

And then there is the welcoming kiss of wife, the ciambering greeting of children, their rosebud lips warm with affection, their bright eyes dancing with Adistry, their solicitudes. with delight, their clinging little arms with delight, their chaging little arms round father's neck; their dear soless lisping love words in his ear. Joy! Has your millionaire cellbate ever once in his withored, dried-up life tasted joy to equal that? Little does he know the well-spring of divinest happiness where only husbands and fathers, wives and mothers are privileged to drink. He ditions it is well provided the laws are wise and necessary. But the attempted application of general laws to local conditions, or vice versa, is often attended with much difficulty, and is simost corrain to be productive of injustice. To quote again from the Manufacturers' Record, "the number of hours which a man may work in a day, the again person must attain before engaging in labor, and the inest play ever staged." mothers are privileged to drink. It is the constant effort of union agitators to create a monopoly in the labor market, which will give them and those whom they misrepresent a monopoly of the one commodity in which all men who earn their living have a right to deal freely and without interference. This commodity is no better, no more justifiable, than to get up a corner in wheat or in any other necessary of life. In so far as the Federal government aids by legitation to eatablish labor monopolies in certain localities or certain industries. Ah! those little ice-cold fingers,

Ah! those little ice-cold fingers,
How they point our memories back
To the hasty words and actions
Strewn along our backward track!
How those little hands remind us,
As in snowy grace they lie,
Not to scatter thorns—but roses—
For our reaping by and by."
Who but the father and the mother
understands the full meaning of these
words—the influence that even a
little child may exert toward the scatlering of seeds of kindness all around
us for the reaping by and by?
There is a tenderness in a father's
heart which no bachelor can ever
feel. Those funny little crosses for
kisses traced by baby's hand at the
foot of mother's letter—are they not
imprinted on memory forever, minted
bankinotes of love? A soldler in the piness—as we have said, there is no such thing in the world. Matrimony may have its folts and jars. But the most beautiful forest paths have their protruding roots or moss-hidden boul-ders that cause us to stumble on oc-casion when we are looking up through the leafage toward the blue skies. The uphill road to Heaven it-self is one of toil, of bruised feet, of tears at times. But it may be more pheerfully trodden than the gentle de-cline down which the gay unthinking trip in satin shoes to perdition.

And when the end comes, when man's great debt to Nature has to be paid, whose is the greater happiness— the solitary bachelor who may have accumulated his millions, or the married man who knows that he leaves boys and girls behind him to help make the world grow better and to keep his memory green? For nobler monument than marble mausoleum or granite pile will be the loving re-membrances of our dear ones, the wife and children. Wealth we leave wife and children. Wealth we leave behind, but such love is of our very soul, and so goes with it to the Great Unknown, where, as that same love teaches us, we shall all surely meet again. And till a loved child has gone before us, does human heart ever fully realize the comforting sweetness of death? Only a little hand to wave us welcome across the ford! But knowing that it is there, we plunge bravely in, even though the waters swirl around our feet, and the night gloom hangs dark o'erhead.

A club woman has written a learned paper to prove that psychological conditions in Chicago are such as to produce a preponderance of brugettes. If she will look into the matter a little more patiently, however, she will probably find that the soot from Chicago's chimney's has as much to do with the conditions as anything else.

In little more than a month from now the fields will be ablaze with poppies, the orange groves of Southern California will be radiant with blosoms and 4,000,000 prune trees in the Santa Clara Valley will leap into white seas of glory. It will be worth while to keep on living to behold that panorama.

Another hopeful sign of the New Year is that nobody has yet produced a song to take the place of "Bedelia."

UNION'S PIPE LINE TO SERVE

Conduit to Furnish Connection With the Seaboard at Port Harford. Fifty-cent Monthly Dividend De-clared by the Union—Oil Men Still Discussing County Bids.

Desides this it will reach a number of properties of other companies. The Standard in its dealings with the Santa Maria producers has never connected as it has at Kern River and Coalinga, so that the Unions line will be the only one to carry oil for the producers. The line is being tested by pumpling water through it. pumping water through it.
The Union has also completed steel
tankage at Port Harford with a capacity of 37,000 barrels for receiving
oil for shipment.

UNION'S BIG DIVIDENDS.

The directors of the Union Oil Company have just declared a series of monthly dividends of 50 cents per share. This will amount to 6 per cent. a year on the par value of the company's stock. The order of the directors will remain in force until rescinded. The Union, which has already paid dividends far in excess of any other oil company in California, has hitherto paid on a basis of 70 cents per share quarterly or \$2.50 a year. The new monthly dividend will be paid on the 20th of each month hereafter. UNION'S BIG DIVIDENDS.

SANTA MARIA GUSHER The Hartnell well at Santa Maria-the famous gusher whose outpourings of oil forced the Union to make the of oil forced the Union to make the county a gift of thousands of barries to keep it from flooding the country—has produced 400,000 barries since it was struck on December 3 and began to shoot oil over the derrick at the rate of 15,000 to 15,000 barries a day. The company now has the product turned into a 5½-inch pipe which carries it two and a half miles to a reservoir built for it. It is still flowing 7000 barries a day and it has been found impossible to shut it off. If allowed it would doubtless still be pouring 15,000 barrels over the top of the derrick. The well is the heavlest producer yet at Santa Maria.

THOSE COUNTY BIDS. THOSE COUNTY BIDS.

Set producer yet at Santa Maria.

THOSE COUNTY BIDS.

The latest call of the County Supervicors for oil bids that virtually bar the whole of Southern California, as well as the city field, continues to be the topic of discussion among oil men. Practically all the local operators say that there is no oil to be had with 80 per cent. of asphalt, and very little, if any, with 60 per cent., the minimum demanded. It is reported, however, that a Sunset operator has declared his readiness to furnish such oil at 50 cents a barrel after paying the freight from Bakerseld. Although the oil containing the heaviest percentage of asphaltum in the State is produced in Kern county and some of the Sunset oil has acquired a reputation for use in roadmaking on account of its large proportion of asphalt, many oil men express doubt as to the chances of getting an oil equal to the demands of the Supervisors.

WHAL FILL CONTRACT.

WILL FILL CONTRACT. Mrs. E. A. Summers, the "oil queen," positively denies that sie is about to forfeit her check or repudiate her last bid for supplying the county oil. This bid was 43 cents a barrel and was made under a call for 20,000 barrels, 20 per cent. more or less, the oil to be 14 gravity or less—nothing being

The United States now producer about 110,000,000 pounds of prunes annually. Of this supply the American people gladly and with much good to themselves consume 100,000,000 pounds. The balance is sent abroad to fill up foreigners with peace and good will.

Up there in the State of Washington, where a colony of "free love and no laws" has been established, they'll soon find that the lack of law may work all right, but that the free-love business will eventually smash things into a million splinters.

If the present outbreak in Russia should fail in accomplishing its purpose it will be due to the "butting in" of those sanguine anarchists who are taking advantages of the situation to fiaunt the red flag and pound bar-room tables with beer steins.

LETTERS TO THE TIMES.

A Russian on Russia.

LOS ANGELES, Jan. 25.—[To the Editor of The Times:] The question which interests the great majority of the civilized world today is: "What is the near future of Russia?"

Editors and editorial writers speculate more or less intelligently upon this subject, drawing conclusions from history. But history had so far no Slavrevolution to record, and Russia proper so little known, is such an enigma

sky, Prince Galitzin and other wise Liberals.

The idea of these disturbances interfering with the Japanese war is absurd. In two weeks the whole incident will be forgoiten. It was the first quiver of a monstrous embryo, its head has still to form; its tail is not yet ready to move. It takes more than golden garments, a cross and an ikon to lead a revolution. It takes arms and brains, and Gopon, the priest, has neither. Autocracy can't live forever in Russia. It was nearly dying a few days ago. The foolishly fanatic move of the projectariat has given it a new lease of life.

Judge Charles Swayne, who was ap-pointed by President Harrison in 1889 to preside over the United States Dis-trict Court for the northern district He is a native of Delaware and is now nearing the sixty-third year of his age. He is a graduate of the University of Pennsylvania, in which-State he pursued the practice of law for many years, removing to Florida only four years prior to his appointment as a Federal judge.

While tramendous political influences have been hard at work inaide the ranks of the Republican party.

In a general way it may be said that Judge Swayne appears to have greatly abused the trust reposed in him by resorting to dishonest meth-ods of grafting and by traveling cheek by jowl with notorious per-

Labor organizations have cen pernicionaly active in urging legislation of this character, aiming at the establishment of uniform hours of labor, prescribing the age at which minors shall be permitted to watch minors shall be permitted to work, etc. For reasons which will be apparent upon a little considera-tion, such legislation by the general government is not practicable; for as the Manufacturers' Record points out, "in a country of such territorial magnitude and such diverse local con-ditions as the United States, there often is no little difficulty in distinguishing local problems from ques-tions of national scope and importance," and "failure to consider the varying conditions of widely-sepof attempting national legislation af-fecting matters which fall properly

DOWNED BY AUTO.

A. M. Edelman.

W. F. Ashbridge, an Episcopal clergyman of No. 222 East Thirty-eighth street, was run down and seriously injured by an automobile driven by A. M. Edelman, architect, at 2:39 o'clock yesterday afternoon on Main street, near Twenty-seventh.

Mr. Ashbridge was riding homeward on a bicycle, and was on his own side of the street when in attempting to keep clear of a car he was apprised of the proximity of the automobile by the shouts of several pedestrians. With a rush and a roar the machine driven by Edelman struck the minister and ran over him. The wheel was thrown to one side badly battered.

Edelman stopped his machine and went to the assistance of the injured man, who was placed in an ambulance and sent to the Receiving Hospital. The minister was unconscious from shock and a broken arm, but he soon rallied. Accounts concerning the accident differ, but the clergyman and several eyewitnesses allege that the fault was with the chaufteur, who was speeding his machine regardless of the safety of wheelmen and pedestrians. Rev. Ashbridge will recover.

A West Adams street car of the Interurban Railway Company and a peddler's wagon driven by Lou's Wisenberg, collided on Hill street between Eighth and Ninth streets at 4:30 o'clock yesterday afternoon. The wagon was wrecked and Wisenberg sustained painful injuries by being thrown to the street.

Wisenberg attempted to pull across the track in front of a south-bound car and had apparently crossed in safety, but the rear steps struck and capsized the wagon. Wisenberg, who is crippled in his arms, was thrown out and narrowly escaped being crushed by the wheels. He was sent to the Receiving Hospital where an examination showed that he was suffering from shock and internal injuries. His condition may prove to be serious.

RAN FRANCISCO, Jan. St.—[Exclusive Dispatch.] Business in the frait market continued dull today, and the undertone issued toward casiness, with irregular prices. Oranges dragged slowly, and the auction sale was the poorest this season. Five carloads of navels were offered, and with bidding indifferent, it was with difficulty that the stock was disposed of within the following range of low prices: Fancy. 1.26(1.4); choice, 1.00(1.5); standard, 56(1.1). The weakness at auction rooms was reflected at stores, and under fresholdings prices were irregular and in favor of buyers. While some frew brands were held up to top prices, the built of the day's easieness of the standard, and the season was reported che without feature, and prices were nominal. Apples were weak, under heavy stocks and sluggish trade. The market for potatoes was barren of feature and prices were not revised. Ewest potatoes met with good request and close clean-ups of best sorts were casily effected at prevailing prices. Receipts of miscellancous vegetables from the South were extremely light, and fancy parcess of all descriptions met with aprived and as a sharply-advanced rative, and readily sold at improved prices.

anything that has happened there for years. An excited citizen who did not give his name telephoned to police headquarters telling the desk sergeant that a burgiar had been corralled in No. 21 Hemlock street and that the people in the house were even then shooting at him.

The help was sent in a hurry. The captain of detectives and two officers left headquarters on a run, picking up all the patrolmen they happened to meet, and by the time they reached the place they had collected a force which any burgiar would do well to avoid.

They found the street ful of people, many armed, but all keeping a safe distance from the house. It took but a moment to learn that the shooting had not been done in the house but in a chicken yard in the rear, and that was then under guard—from safe distance—by a number of neighbors who had not been told what had really happened, and who thought they were preventing the escape of a gang of burgiars. They hadn't lost any burgiars, but it one happened to come their way they were prepared to show their valor.

A dark object lying in a corner of the chicken yard was pointed out to the officers. It was not the body of a burgiar, although dead.

Then the truth came out. Dogs had been killing chickens in that yard and the owner had ambushed two of them. He succeeded in killing one, but the other escaped. The police "army" faced about and "marched down again."

FINALLY WITHDRAWN FROM LOS BOLSAS DISTRICT.

Superior Judge Decides Orange County Supervisors' Order Which Placed School There Was Illegal. Santa Ana High School to Have Mid-year Graudation Next Month.

SANTA ANA, Jan. 25.-After a bit-SANTA ANA, Jan. 25.—After a bitter legal contest extending over nearly five months, Laurel School district, in the western pat of the county, has succeeded in withdrawing from the Los Boisas Union High School district through a judgment given by Judge West today declaring illegal the order of the Board of Supevisors which placed Laurel in the high school district.

Los Boisas High School district was formed in July, 1903, from a number of the peatland grammar divisions. In September following petitions were presented to the Supervisors asking them to include Laurel district in the same division, representing that a ma-

presented to the Supervisors asking them to include Laurel district in the same division, representing that a majority of the Laurel residents and two of the three trustees were favorable to the change. Laurel's position in the western part of the county, embracing the town of Los Alamitos, makes it almost impossible for children from their to attend the high school, located several miles distant, and from the first tax payers registered a vigorous protest against their connection with the high school.

Finally D. J. Parker commenced proceedings against the individual Supervisors to have the original order of the board reviewed and declared lilegal. Among other allegations Parker claimed that signatures to the petition asking for the incorporation of the district in the high school district were obtained by paid solicitors from outside districts, securing names at the rate of 25 cents apiece, and that fraudulent names were presented to the Supervisors as the trustees of the district.

Judge West's decision sets aside the order of the Board of Supervisors and declares that Laurel district is no part of the Los Bolsas Union High School district. Objections and demurrer of the defendants are overruied.

The affair was Scotch from start to finish, from the skirling on the bagpipes by three pipers in Highland costume to the final singing of "Auid Lang Syne," The "Blue Bells of Scotland" and the Scotch highballs had their places on the menu, and on the programme and there was little difference in the enthusiasm inspired by each.

Dr. Tom Davidson, president of the club, was chairman of the evening, and Malcolm MacLeod, in full Highland costume of his clan, acted as toastmaster. The absence of the vice-president of the club, Matthew C. Melklejohn, was explained by the statement that the birthday of the bard of Ayr was celebrated at his home by the arrival of another "Bobble Burns."

Those who wore the tartans of the Stewarts, the Campbells, the MacGregors and of all the other clans forgot their old feuds when the pipers played "The Campbells Are Coming," and the waiters bore into the dining-room the trays laden with Royal Scotch Haggles, Tam o' Shanter style.

The menu was printed in the "Cotter's Saturday Night" dialect, and few of those who partook needed to be told that "stoved an' champit tattles" was nothing more nor less than mashed potatoes.

FAKE DEAF MUTES.

The charitably inclined have been called upon during the past few Cays by a couple of supposed deaf mutes who were beggling money. One posed as having once been a celebrated tenor singer in New York, who lost his voice through illness. The other fellow had as sorry a tale. But the pair were overheard comparing notes and recting their experiences. This conversation, not intended for public ears, was taking place in an alley in the rear of a store. The trend of the conversation was, in effect, that the supposed mutes had found this beach easy picking. The fellows were making good money out of the graft. The accidental eaves-dropper reported his discovery to the officers, but, unfortunately, owing to the darkness of the alley, his description was not accurate. The C. leers picked out two men and held them on suspicion, but after investigation no evidence could be gathered upon which to hold them, and they were released.

### SANTA MONICA.

SANTA MONICA, Jan. 25 .- Justice of the Peace Jenness this morning committed Earl Kemp to the Los Angeles Detention Home. Kemp is the lad who was picked up here yester-day by Constable Pritchard, who sus-pected that the woful tales being told by the boy while begging from house to house were being manufactured for the occasion. The boy, who is scarce-ly a dozen years old and small for his age, at first stated that he and a couple of boy companions had beaten their way down from British Columbia their way down from British Columbia and were in camp in a shack near the long wharf. The officers investigated this and found that there were no stray campers in that vicinity. They did find, however, that the lad in question had been doing some miscellaneous appropriating of property belonging to others in that vicinity. Later the boy confessed that the British Columbia story was all a lie and that his home was at No. 803 East Twenty-eighth street. Los Angeles, where he resided with his parents. It developed in the inquisition that the boy is the one who had a few days ago mysteriously disappeared while detected in full possession of a room in an Ocean Front lodging-house. The court thought the best place for him was in the detention home, at least until it was found out positively where he belonged.

FOR NEW PAVILION.

The Council Committee today met with Architects Starbuck and Cruth of Long Beach, and F. P. Burnham, Hunt and Eager, J. C. Newsom and Train and Williams of Los Angeles, who submitted plans for a new pavilion, ranging in coat from \$22,000 to \$35,000. Explanations were made in detail of each plan and the committee will meet Thursday morning to make a selection.

revival managers as a mid-week Saibath, and business was generally suspended this afternoon from 2 to 5 o'clock, nearly all the business houses closing. Services were held at the union tabernacle, which was packed to the doors and a strong sermon delivered by Evangeliet Lyon. The singing of a monster choir under direction of J. W. Patte son was a feature.

Installation services by the Lady Maccabees last high were very interesting. Handsome lodge pins were presented the retiring officers and Mrs. Jennie Truax, installing officer, was the recipient of a set of fruit knives. A social session followed, the features of which were a fine musical programe and refreshments.

Marshal Conklin and Deputy Severa raided a disreputable resort on West Fourth street last night, and gave the inmates two hours to leave town. Two other places are under surveillance, and will receive the same medicine. Long Beach will not tolerate a tender-loin district.

The Royal Arch Masons tonight installed the following officers: George C. Flint, High Priest; C. E. Mitchell, King; A. J. Stewart, Scribe; C. L. Heartwell, Treasurer; A. M. Abbott, Secretary.

HOSPITAL PLANS ACCEPTED.
LONG BEACH, Jan. 25.—Plans drawn by Architect Starbuck for the new hospital were accepted today at a meeting of the directorate, and bids will be asked for at once. The association has purchased 136x250 feet on Tenth street facing Linden and affording for the new hospital an unobstructed view of the ocean. The structure consists of a main building 69x115 feet, with a rear wing 52x120 feet. It is to be of pressed brick with artificial stone basement walls and facings. On the main building will be a roof rarden and two solariums. The style of architecture is of the classical order, and will be pretty and tasty. The building will contain forty rooms for patients, three wardrooms and operating and sterilizing rooms. The nurses will be housed in pretty cottages apart from the hospital. Everything will be modern and up-to-date.
